Please ensure you are using the latest version of RokNavMenu, available [here](#) . **Menu Types**

- [Fusion Menu](#)

A Mootools enhanced CSS dropdown menu, with multi-columns, icons, inline modules and more.

- [SplitMenu](#)

A static two level menu placing parents items in the header area, and child items in the sidebar.

- [No Menu](#)

An option to disable the menu, allowing for normal module use of the **navigation** position.

Fusion is inoperable in **IE6**, and will automatically switch to **Suckerfish**. **Configuration**

Go to **Extensions** ▢ **Template Manager** ▢ **rt_omnicron_j15** ▢ **Menu Control** to find all the parameters for Fusion Menu and Splitmenu, such as transitions, duration and sublevel position.

Descriptions of each template parameter can be seen when you mouseover the label of each option.

Fusion Menu with Mega Menu

Fusion Menu is a menu theme of the **RokNavMenu** extension, the addon that drives all RocketTheme template menus. It is primarily a javascript enhanced CSS dropdown menu, that combines standard suckerfish type functionality with animations, transitions and other advanced effects provided by Mootools.

NOTE: The latest version of [RokNavMenu](#) is required, in order for Fusion to operate.

Latest Features

Below is a list of the most recent features added to Fusion Menu:

- Triple / Quad Column Mode
